DETAILED ACTION

1. Amendment filed on August 21, 2007 has been entered.
2. Claims 1, 4-26, 29-30, 33, 35, 37-43 are presented for examination.

Reasons for Allowance

3. Claims 1, 4-26, 29-30, 33, 35, 37-43 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1, 4-26, 29-30, 33, 35, 37-43 include allowable subject matter since the prior art made of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed limitations. The prior art does not teach the claimed invention having a semiconductor memory device comprising a control circuit for controlling the oscillator circuit and the word line enable circuit so that as the operation mode of the memory device changes from an active mode to a stand-by mode, a pulse width of the word line enable signal is widened, and a period of the oscillation signal is lengthened after a given time elapses from the beginning of the stand-by mode, and the detector circuit generates a flag signal for controlling the oscillation circuit based on a detection of a change in operation mode of the device, and the buffer circuit and detector circuit control the oscillating circuit so that a period of the oscillation signal is maintained for a given period of time as the device changes mode of operation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
